EXPERIENCE

Sheridan College Aug. 2026 – Present

Peer Mentor - Student Advising and Learning SupportsS Oakville, Ontario, Canada

- Assisted students with academic inquiries, campus navigation, and access to college resources, ensuring a positive and welcoming student experience.
- Built positive relationships with students from diverse backgrounds, fostering an inclusive and supportive campus environment.
- Supported Fall 2026 Orientation by managing check-ins, directing students, and coordinating with staff to resolve issues efficiently in high-traffic environments.
- Initiated and executed **25+ outreach events**, contributing to 25+ campus events and engaging over **100+ students**, increasing participation in campus activities by **15%**.

Sheridan College Aug. 2025 – April 2026

Peer Mentor - International Services Team Oakville, Ontario, Canada

- Served as the primary point of contact for new students, handling high-volume inquiries and guiding them to academic and campus services at Sheridan College and SSU.
- Provided critical support during a 7-week campus strike, assisting students with navigating alternative resources.
- Supported Fall 2025 Orientation by managing check-ins, directing students, and coordinating with staff to resolve issues efficiently in high-traffic environments.
- Initiated and executed **100+ outreach events**, contributing to 25+ campus events and engaging over **500+ students**, increasing participation in campus activities by **35%**.

Radhwa International School May 2025 – Aug. 2025

Information Technology Intern Yanbu Al Sinaiyah, Saudi Arabia

- Maintain and troubleshoot the network infrastructure and Wi-Fi connectivity, resolving hardware, software, and configuration issues to ensure uninterrupted classroom operations.
- Provided technical support for staff systems, including PC troubleshooting, software installations, and system updates.
- Assisted in Smartboard deployment and classroom technology setup, ensuring proper integration with school systems and minimizing downtime during academic sessions.

Sheridan College Jan. 2025 – Apr. 2025

Peer Mentor Oakville, Ontario, Canada

- Initiated and coordinated over **25 outreach events** this semester, effectively engaging **250+ students** to foster a sense of community and increase participation in campus activities by **40%**.
- Facilitated peer-to-peer communication, helping students transition smoothly into college life and adapt to a new academic environment.
- Assisted incoming students with academic and campus-related inquiries, providing guidance on resources, scheduling, and student services.
- Supported campus outreach initiatives by engaging students during events and promoting involvement opportunities.

Radhwa International School Sept. 2023 – May 2024

Website Developer Yanbu Al Sinaiyah, Saudi Arabia

- Engineered innovative web solutions that **enhanced user engagement by 40%**, driving a **30% increase** in overall website traffic and significantly improving customer satisfaction ratings.
- Developed an intuitive content management system utilizing modern frameworks, empowering over 20 non-developer team members to efficiently update website content, resulting in a **50% decrease** in turnaround time for new updates.

Self Employed Jun. 2021 – Aug. 2021

Website Developer Yanbu Al Sinaiyah, Saudi Arabia

- Created an interactive productivity tracking tool with automated features, serving **50+ users** and generating positive feedback on usability.
- Managed full project life cycles, from client consultations to deployment, enhancing skills in database integration and responsive design for educational and business platforms.

PROJECTS

WasteWise

- Built a web app that uses AI to scan grocery receipts and automatically track food items
- Developed a smart inventory system that alerts users about expiring items and reduces food waste
- Integrated Firebase and AI (Gemini) to provide real-time updates and personalized recipe suggestions

Schrozberg Zombie Outbreak Simulator

- A multi-dimensional grid-based simulation built using object-oriented principles in C#
- Simulates the dynamics of humans and zombies within a bounded grid space

Blockchain Security System

- Designed to analyze and detect phishing attempts within blockchain transactions
- Using advanced machine learning and transaction analysis, the system identifies suspicious activities and alerts users by detecting patterns indicating chances of phishing attempts, such as fraudulent addresses or unusual transaction behaviors.
